

Thank you for selecting a Larsen antenna!

This antenna comes pretuned from the factory for optimum performance in your specified frequency range. No additional tuning required.

If you have questions regarding this or any Larsen product please call
1 800 ANTENNA (268-3662).

Note: Larsen NMO antennas come from the factory with both an O Ring and a SuperSeal Gasket (RGSS). Use one or the other for mounting the antenna – both cannot be used together. The RGSS is typically used for permanent mounts.
